- Food Source and Receptacles

Notes: _____

Facility

- Physical Appearance:** The premise should be neat and free of clutter inside and out. The grounds should be mowed and kept free of waste, unused and discarded materials. All buildings must be in good repair. The premise should reflect a positive image.
- Animal Security:** The facility must be designed and constructed for proper housing of dogs. All animal containment areas, primary enclosures, exercise areas and building are secure from animal escape and prevent predator intrusion.
- Waste Disposal:** The building must be maintained with minimal odors, drafts, ammonia levels and condensation. Waste and water must be readily eliminated from the animal area as needed to minimize contamination and disease risks.
- Surfaces and Cleaning:** The facility must be free of excessive rust and chewed surfaces. All surfaces must contribute to a sanitary environment. All components of construction must be structurally intact and/or replaceable when necessary.

Iowa Kennel Assurance Program
Evaluation Form

- Primary enclosures:** Must be in good repair and free from excreta and excess accumulation of hair or fur. A resting surface will be provided.
- Utilities:** The facility has wiring and plumbing in good working order, not subject to any dangerous situation for persons or animals, and in compliance with all building codes.
- Storage:** All storage is to be kept orderly, clean and non-expired.
Food is stored in a manner that prevents contamination and spoilage.
Medication, Pharmaceuticals and First Aid are stored in a healthy manor.
Cleaning Supplies are stored separate from food, medical supplies and dogs.
- Maintenance Plan:** Maintain a plan for repairs that cannot be readily attended to.
- Temperature / Ventilation:** Housing facilities must be maintained such that these factors do not cause adverse conditions or health risks to the dogs. This includes sick, infirm, quarantined, young, prenatal or geriatric dogs.
- Lighting:** Lighting shall allow for a seasonal diurnal cycle in geographic region of the kennel. This may be achieved through natural or artificial cycle.
- Thermometers:** Shall be displayed in every facility room housing dogs.
- Shelter from the elements:** Protection from adverse environmental conditions will be readily available at all times, i.e., huts with outside runs and play yards.
- Transportation:** All aspects of the United States Animal Welfare Act
